

## Non-camera E-surveillance solutions

- Home system will provide round the clock surveillance without line of sight restrictions.
- It will improve the security perception in campuses by prompting people to authenticate themselves periodically.
- Suspicious movement in campuses could be identified and reported in real time.
- Movement of visitors could be restricted to the authorized route.
- Heat map will help in crowd management.
- A low-cost solution for ensuring resource utilization by authenticated customers will reduce pilferage and improve the business in hospitality sector.
